

1. 预定义角色

connect, resource, dba

- connect 具有哪些权限:

alter session、
create cluster、
create database link、
create session、
create table、
create view、
create sequence

- resource 具有哪些权限?

create cluster
create indextype
create table
create sequence
create type
create procedure
create trigger

- dba 具有哪些权限?

dba角色具有所有系统权限

2. 自定义角色

建立角色

create role myrole not identified;

create role myrole1 identified by m123;

角色授权

grant create session to myrole with admin option;
grant select on scott.emp to myrole;
grant insert,update,delete on scott.emp to myrole;

用户授予角色

```
grant myrole to tom with admin option;
```

删除角色

```
drop role myrole;
```

3. 显示所有角色

```
select * from dba_roles;
```
